OFFICE OF THE MAYOR
May 15, 1987

TOM BRADLEY
MAYOR

Mr. R. R. Heppe, President
Lockheed Corporation
Lockheed-California Company
P.O. Box 551
Burbank, California 91520

Dear Mr. Heppe:

Groundwater Pollution Conditions
at Lockheed Corporation Facilities

We understand that a preliminary groundwater monitoring study conducted in response to the California Regional Water Quality Control Board - Los Angeles Region has revealed serious contamination of the groundwater basin below Lockheed Corporation facilities in the San Fernando Valley. This matter is of deep concern to us and the people we represent in the Cities of Burbank, Glendale, and Los Angeles because a substantial portion of our water supply is drawn from the groundwater basin adjacent to your property. These waters serve both our normal consumption and as an emergency supply during periods of drought such as we may now be entering in 1987.

It is essential that your company work cooperatively and expeditiously with the Cities of Burbank, Glendale, and Los Angeles to assure that this pollution does not migrate and add to the already serious problem of contaminated water wells in the area. We are sure that as a responsible member of our urban community you will take diligent action to correct this condition. To the extent that our actions can be helpful in achieving this goal, we offer our cooperation and look forward to developing mutually acceptable plans to achieve this objective and to eliminate our concern.

Sincerely,

Ginger Bremberg
GINGER BREMBERG
Mayor, City of Glendale

Michael R. Hastings
MICHAEL R. HASTINGS
Mayor, City of Burbank
